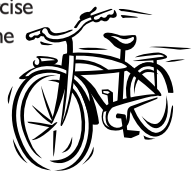
Three Simple Steps for Fall

1 **Take mass transit**, and consider riding your bike or walking to the bus or transit stop instead of driving. Even if you do it just once or twice a week, you'll reduce traffic congestion and pollution…and save money. The average driver spends about 56 cents per mile on car ownership and maintenance expenses.

2 **Ride your bike or walk instead of driving.** They're easy ways to get exercise and they're easy on the air. Vehicles on the road create more than 25% of all air pollution nationwide.



3 **Share a ride or car pool.** Every time you share a ride, you're helping to reduce emissions by almost half.

Spread the word. If everyone took just a few of these simple, easy steps, it could make a big difference, because —

It all adds up to cleaner air
